## PROJECTS

### Twitter Clone

🔗 <https://github.com/RisingGeek/twitter-clone>

A minimalistic clone of Twitter built using React, Redux, NodeJS and MYSQL. Features of twitter clone:

- Add Tweet
- Follow people
- Like, retweet, comment
- View profile
- Search users

### Peer Share

🔗 <https://github.com/RisingGeek/CodeEditor>

Peer Share is a platform where users can share an interactive editor and write code together. It has language support for C , Java and Python. This project is based on the concept of operational transformation which forms the basis for a shared editor. Users can communicate via video call and also run code.

### Web Chat application

🔗 <https://github.com/RisingGeek/chatapp>

A web chat application that allows chatting and sharing photos.

### Spending Tracker

🔗 <https://github.com/RisingGeek/spending-tracker>

This application manages expense so that you can keep track of your spending.

## OPEN SOURCE

### Vega Editor

A web application for authoring and testing Vega and Vega-Lite visualizations. Data visualizations can be described in a JSON format to generate interactive views.

### MSK UI

MSK UI is a library consisting of various components that are used to build professional documents like resume, job description.
